EXPERIENCE

Software Developer

February 2023 – Present

Bestfares365, Sydney, Australia

- Engineered a high-performance Next.js website with Tailwind CSS, optimizing front-end responsiveness and reducing load times by 30%, resulting in an enhanced user experience and improved SEO rankings
- Spearheaded API integrations with Amadeus Quick Connect for Flights (REST) API, leveraging Node.js and Express to streamline real-time flight data retrieval and booking functionality, ensuring seamless user interactions
- Implemented Hotelbeds API for dynamic hotel and room availability, enabling real-time search and booking capabilities, which increased platform versatility and customer satisfaction
- Designed and developed a scalable three-tier dashboard system for Admin, Agents, and Users, facilitating efficient booking management, analytics, and reporting, leading to a 25% improvement in operational efficiency

Technology Consultant

May 2022 – February 2023

Deloitte India (Offices of the US), Gurugram, India

- Led a team of 5 UI developers and successfully released the client's application using micro frontends for the US region
- Exponentially increased the code reusability by creating generic components and services using React which decreased the lines of code by 20%
- Developed highly customizable Azure B2C screens for sign up, sign in, change password, forgot password and change number flows using custom policies and integrated Azure with Angular application using MSAL
- Integrated Adobe Analytics with the Page Flow Engine provided by the client to track and analyze the user data
- Built extensive Jest tests for Web Angular components with coverage above 90%
- Reviewed and tested all the customer-facing prototypes before deployment, applying best-practice diagnostic techniques to verify the usability

Technology Analyst

May 2019 – April 2022

Deloitte India (Offices of the US), Hyderabad, India

- Improved client's website's efficiency, data quality, operability, and flexibility in an Agile-driven environment to effectively maintain project timelines and utilize available resources
- Produced responsive websites compatible with multiple browsers, devices, and resolutions
- Restructured the website using Ionic to make the website more adaptive to devices like mobiles and tabs as the framework allows the user to easily convert the website to a mobile application
- Enhanced user experiences and improved site interactions by 65% using chart.js and gamification to reward the end user for using the application

Operations Consultant

May 2018 – December 2018

Uber, Chandigarh, India

SKILLS

Programming Languages: TypeScript, HTML5, CSS3, JavaScript
